Document Module Screen Design

https://gemini.google.com/app/d7bdd6550c8b3e4d

User prompt: Help me list the screen and the required information for Document Module, the screen must follow the flow that we're having and follow the data that we have. First is the listing screen, with required functions.

Response: Based on the current Accura Documents Dashboard, below is the complete breakdown of the **Document Module** screens, starting with a detailed specification for the **Document Listing Screen** and followed by the subsequent screens in your document lifecycle flow.

1. Document Listing Screen

The Listing Screen serves as the central repository for viewing, filtering, and managing all controlled documents across their lifecycle stages and versions.

Required Data Fields (Table Columns)

- **ID:** Unique system identifier formatted as `[ORG]-[TYPE]-[YEAR]-[6-digit sequence]` (e.g., `ACME-BR-2026-000001`, `ACME-SOP-2026-000016`).
- **Name:** Document title displayed as a clickable link to open the document details (e.g., `Equipment Introduction Form`, `Sample Management`).
- **Status:** Visual badge indicating the current workflow stage (`Draft`, `In Review`, `In QA Approval`, `Approved`, `Superseded`, `Obsolete`).
- **Version:** Major/minor version number (e.g., `v1.0`, `v2.0`) paired with a status sub-label (`Current version`).
- **Department:** The owning department responsible for the document (e.g., `Quality Control`, `Engineering`).
- **Author:** Full name of the user who created or owns the document version (e.g., `Amit Kothari`).
- **Effective Date:** The date the document version becomes active in `DD-MMM-YYYY` format (e.g., `13-Oct-2026`), or a dash (–) if unapproved or not yet assigned.

Required Functions & Controls

- **Create Document Action:** A primary `Create Document` button in the top-right header to initiate a new document record.
- **Keyword Search:** A real-time or submit-based search bar (`Search by name, ID, author…`) that queries across the Document Name, Document ID, and Author fields.
- **Status Filter:** A dropdown filter supporting `All` (default), `Draft`, `In Review`, `In QA Approval`, `Approved`, `Superseded`, and `Obsolete`.

- **Document Type Filter:** A dropdown filter supporting `All` (default), `BR` (Batch Record), `frm` (Form), `pol` (Policy), `pro` (Protocol), `sop` (Standard Operating Procedure), `spec` (Specification), and `wi` (Work Instruction).
- **Department Filter:** A dropdown filter supporting `All` (default), `Engineering`, `Manufacturing`, `Quality Assurance`, `Quality Control`, `Reg Affairs`, `Regulatory Affairs`, and `Research & Development`.
- **Parallel Version Display:** Ability to display multiple versions of the same Document ID simultaneously in the list when a newer version is undergoing review while the prior version remains approved (e.g., `ACME-FRM-2026-000005` and `ACME-PRO-2026-000001` each showing `v1.0` as `Approved` alongside `v2.0` as `In Review`).
- **Pagination & Row Count Controls:** A `Rows per page` selector (`10`, `20`, `50`), a total record counter (`52 documents`), and page navigation controls (<, numbered pages 1–6, >).

2. Subsequent Screens in the Document Module Flow

To support the statuses, document types, and versioning patterns shown on the listing screen, the Document Module requires three additional core screens:

A. Create / Edit Document Screen (`Draft` Stage)

Triggered by clicking `Create Document` or editing an existing `Draft` record.

- **Required Information:**
  - **Document Metadata:** Document Name, Document Type (`BR`, `FRM`, `POL`, `PRO`, `SOP`, `SPEC`, `WI`), and Owning Department.
  - **System-Generated Fields:** Auto-assigned Document ID (`ACME-[TYPE]-2026-XXXXXX`), initial Version (`v1.0`), Status (`Draft`), and Author (defaulted to the logged-in user, e.g., `Amit Kothari`).
  - **Content & Attachments:** Rich-text editor or file upload area (for PDF/Word protocols, flowcharts, specifications, and forms).
  - **Workflow Routing:** Selection of technical reviewers (for the `In Review` stage) and QA approvers (for the `In QA Approval` stage).
- **Required Functions:** Save as `Draft`, Preview Document, Cancel/Discard Draft, and Submit for Review (transitions status from `Draft` to `In Review`).

B. Document Detail & Viewer Screen

Triggered by clicking a document's `Name` from the listing table.

- **Required Information:**
  - **Metadata Summary Header:** Displays `ID`, `Name`, `Status`, `Version`, `Department`, `Author`, and `Effective Date`.

- **Document Viewer:** Read-only rendered view of the controlled file or content.
- **Version History Tab:** Lists all historical and in-flight versions (`v1.0`, `v2.0`, etc.) with their respective statuses (`Approved`, `In Review`, `Superseded`) and effective dates.
- **Audit Trail & Cross-Module Links:** Timestamped log of status changes, plus links to connected eQMS modules visible in the navigation (`Training`, `Change Management`, `Deviations`, `CAPA`).

- **Required Functions:**
  - **Create New Version (Revise):** Clones an `Approved` `v1.0` document into a `v2.0` record while keeping `v1.0` active until `v2.0` is approved.
  - **Retire / Obsolete:** Allows authorized users to transition an `Approved` document to `Obsolete`.
  - **Download / Print:** Exports the document according to role permissions.

C. Review & QA Approval Workflow Screen (or Drawer/Modal)

Manages the multi-stage progression (`Draft` → `In Review` → `In QA Approval` → `Approved` → `Superseded`).

- **Required Information:**
  - **Reviewer / QA Task List:** Assigned reviewers, review status, and comments/feedback.
  - **Approval & Effective Date Configuration:** Date picker to set or confirm the `Effective Date` (e.g., `13-Oct-2026`) upon QA approval.
  - **Electronic Signature Capture:** User credentials, role verification, reason/meaning of signature, and timestamp.
- **Required Functions:**
  - **Technical Review Actions (`In Review`):** Approve (advances status to `In QA Approval`) or Reject/Request Changes (returns status to `Draft`).
  - **QA Approval Actions (`In QA Approval`):** Final Approve (sets status to `Approved`, populates the `Effective Date`, and automatically transitions any prior approved version to `Superseded`) or Reject back to `Draft`/`In Review`.

Would you like to detail the exact field validations, user permissions, and state-transition rules for the **Create/Edit Document** screen next?

User prompt: Next is the creating new document

Response: The **Create New Document** screen on the Accura Documents Dashboard uses a two-column workspace with a bottom action bar to capture document files, metadata, cross-references,

and approval routing.

1. Required Information & Data Fields

Left Column: Category & File Management

- **Document Category:** Selection toggle between **Controlled Document** (formal review, approval, and version lifecycle) and **External Document** (outside reference/compliance files).
- **Primary Document File:** Main file dropzone (`Upload a document`) for uploading the core document file.
- **Attachments:** Supporting file uploader (`Add Attachment`) allowing up to 5 supplemental files (`0 / 5` counter, defaulting to `No attachments added.`).

Right Column: Metadata, References & Routing

- **Document Name (Required ∗):** Free-text input for the document title (placeholder: `e.g. Document Control Procedure`).
- **Document Type (Required ∗):** Dropdown selector with 12 configured types: `Batch Record (BR)`, `Design Specification (DS)`, `External Document (EXT)`, `Functional Specification (FS)`, `Material Specification (MS)`, `Product Specification (PS)`.
- **Additional Document Types:** Also includes `Record (REC)`, `Report (REP)`, `Template (TMP)`, `Test Method (TM)`, `User Requirements Specification (URS)`, and `Validation Master Plan (VMP)`.
- **Department (Required ∗):** Dropdown selector for the owning department, currently populated with `Engineering` and `Quality Control`.
- **Related Documents:** Searchable link field (`Search documents to link...`) to associate peer documents related to this record.
- **Referred Documents:** Searchable link field (`Search documents referenced...`) to link upstream/prerequisite documents cited within this document.
- **Reviewers (Required ∗):** User search/selection input (`Search reviewers...`) to assign technical reviewers for the `In Review` stage.
- **QA Approver (Required ∗):** User search/selection input (`Search QA approvers...`) to assign quality approvers for the `In QA Approval` stage.

System-Generated Fields (Created on Save/Submit)

- **Document ID:** Auto-generated upon creation using the selected `Document Type` code (e.g., `ACME-BR-2026-XXXXXX`).
- **Author:** Automatically assigned to the logged-in user (`Amit Kothari`).

- **Version & Effective Date:** Initialized as `v1.0` with an empty Effective Date (–) until final QA approval.

2. Required Functions & Screen Actions

- **Back Navigation:** `Back to Documents` link in the top-left header (and `Cancel` in the footer) to discard unsaved input and return to the Document Listing screen.
- **Category Switching:** Selecting `External Document` vs. `Controlled Document` governs whether full lifecycle/approval controls apply.
- **Attachment Cap Enforcement:** Restricts supporting uploads to a maximum of 5 files (`0 / 5`).
- **Save as Draft:** Secondary footer button (`Save as Draft`) that stores the record in `Draft` status so the author can resume editing later.
- **Submit for Review:** Primary footer CTA (`Submit for Review`) that validates all mandatory fields (`*`) and routes the document to the assigned `Reviewers` in `In Review` status.

3. Data Alignment Notes to Address in Design

- **Document Type Mismatch:** The Create screen lists 12 types (`BR`, `DS`, `EXT`, `FS`, `MS`, `PS`, `REC`, `REP`, `TMP`, `TM`, `URS`, `VMP`), whereas the Listing filter uses `BR`, `frm`, `pol`, `pro`, `sop`, `spec`, and `wi`.
- **Department Mismatch:** The Create dropdown only lists `Engineering` and `Quality Control`, while the Listing filter includes `Manufacturing`, `Quality Assurance`, `Regulatory Affairs`, and `Research & Development`.

Would you like to move on to the **Document Detail / Viewer** screen next, or refine the behavior for **External Document** vs. **Controlled Document** creation?

User prompt: This is the screen for the document with status draft

Response: The **Edit Document (Draft Status)** screen on the Accura Documents Dashboard retains the two-column workspace from the creation flow while locking identifier-bound fields and exposing per-file attachment metadata.

1. Header & Record Identity

- **Back Navigation:** `< Back to Documents` link to return to the main listing table.
- **Screen Title & Active ID:** Displays `Edit Document — [Document ID]` (e.g., `Edit Document — ACME-BR-2026-000001`).
- **Status Badge:** Displays the `Draft` status badge inline with the screen header.

- **Record Sub-header:** Read-only summary showing `[Document ID] · [Document Type]` (`ACME-BR-2026-000001 · Batch Record (BR)`).

2. Left Column: Primary File & Populated Attachments

- **Primary Document Uploader:** Collapsible card (with a green > toggle button) containing the `Upload a document` dropzone to upload or replace the primary file.
- **Attachments Header & Counter:** Displays the active upload count (`1/5`) and the `Add Attachment` action button.
- **Attachment Item Sub-Card:** When a supporting file is uploaded, an item card renders with the following fields and controls:
  - **File Badge & Filename:** Displays a `file` type tag alongside the uploaded filename (`IMG_0324.jpg`).
  - **Name (optional):** Free-text input to label the attachment (placeholder: `e.g. Risk assessment`).
  - **Description (optional):** Free-text input for supplemental context (placeholder: `Short description`).
  - **Remove Action:** Inline `Remove` button to delete the attachment and update the `1/5` counter.

3. Right Column: Metadata, References & Approval Routing

- **Document Name (Required ∗):** Pre-populated, editable text input (`Testing – 10-27`).
- **Document Type (Required ∗, Locked):** Read-only field (`Batch Record (BR)`) disabled from editing because the generated Document ID (`ACME-BR-2026-000001`) already embeds the `BR` type code.
- **Department (Required ∗):** Pre-populated, editable dropdown (`Quality Control`, switchable to `Engineering`).
- **Related Documents:** Searchable input (`Search documents to link...`) to add or modify peer document associations.
- **Referred Documents:** Searchable input (`Search documents referenced...`) to add or modify cited prerequisite documents.
- **Reviewers (Required ∗):** Displays currently assigned reviewers (`Amit Kothari`) alongside the search input (`Search reviewers...`) to modify technical reviewers.
- **QA Approver (Required ∗):** Displays the assigned quality approver (`Amit Kothari`) with the ability to update before submission.

4. Required Functions & State Differences

- **Locked Creation Attributes:** Unlike the Create screen, the **Controlled vs. External Document** selector is removed and **Document Type** is locked to preserve ID integrity.
- **Cancel:** Discards unsaved modifications made during the current editing session and returns to the Document Listing screen.
- **Save as Draft:** Saves updated fields, attachments, and reviewer assignments while keeping the document in `Draft` status.
- **Submit for Review:** Primary green CTA that validates all mandatory fields (∗) and transitions the document from `Draft` to `In Review`.

Which screen in the flow would you like to document next—the **In Review / In QA Approval** view or the **Approved** document detail screen?

User prompt: Document with In review status

Response: The Accura Document Review Screen transitions the workspace from an editable form into a read-only verification layout featuring a workflow progress tracker, document viewer, audit trail, and electronic signature controls.

1. Header, Utility Bar & Workflow Stepper

- **Back Navigation:** Top-left Back to Documents link to return to the main document listing screen.
- **Document Header:** Displays the document Name as the primary heading with Document ID and Version underneath (e.g., ACME-FRM-2026-000005 · v2.0).
- **Top-Right Utility Actions:** Provides three quick-action buttons to Download original, Print the document, or View Audit Trail.
- **Workflow Progress Stepper:** A four-stage horizontal tracker showing Draft (completed), In Review (active step 2), In QA Approval (step 3, not started), and Approved (step 4, not started) with assigned user names.

2. Left Column: Document Preview

- **Collapsible Viewer Card:** Features a Preview panel with a green collapse/expand toggle button in the top-right corner.
- **Rendered PDF Canvas:** Displays a read-only viewable PDF automatically generated from the uploaded source file upon submission.

3. Right Column: Read-Only Document Details

- **Core Identifiers & Status:** Displays Document ID, an amber In Review status badge, Document Name, Version, Owning Department, and Author.

- **Assigned Workflow Roles:** Lists Review Approvers (shown as user pills) and the designated QA Approver.
- **Cross-Referenced Documents:** Displays linked Related Documents and Referred Documents by their ID and title (e.g., ACME-PRO-2026-000001: Equipment_IOQ Protocol).
- **Author Electronic Signature:** Records the submitting author's name and submission timestamp (e.g., Amit Kothari • 29-Sep-2026 11:10 AM).

4. Audit Trail Record

- **Event Log Entries:** Lists chronological events with user initials, full name, timestamp with timezone (GMT+7), and specific state or version transitions.
- **Cryptographic Verification:** Displays a truncated SHA256 hash and a Verified badge for each logged action, including source PDF generation and status changes.
- **Export Function:** Includes an Export Audit Report button to download the compliance history for external inspection.

5. Bottom Action Bar: Review Decision Controls

- **Reviewer Prompt:** Displays the active assignee notice ("Awaiting review by Amit Kothari") and states that approving or rejecting requires an electronic signature.
- **Approve & Sign:** Primary green CTA that prompts for an electronic signature and advances the document status to In QA Approval.
- **Reject:** Red destructive button that requires an electronic signature and returns the document status to Draft, accompanied by inline helper text.

Would you like to document the **Approve & Sign / Reject electronic signature modals** next, or move to the **In QA Approval** and **Approved** screens?

User prompt: screen with In QA Approval

Response: The Accura QA Approval Screen advances the workflow to step 3, adding the completed technical review signature, inline text-selection commenting, and a final QA decision bar with document cancellation capability.

1. Header, Utility Bar & Workflow Stepper

- **Back Navigation & Title:** Displays the Back to Documents link above the document title (Test) and the Document ID and Version subtitle (ACME-WI-2026-000013 · v1.0).
- **Top-Right Utility Actions:** Provides quick-action buttons to Download original, Print the document, or jump to View Audit Trail.

- **Workflow Progress Stepper:** Marks Draft (step 1) and In Review (step 2) as completed, highlights In QA Approval (step 3) as the current step, and shows Approved (step 4) as not started.

2. Left Column: Document Preview & Inline Commenting

- **Zoom & Preview Controls:** Displays zoom adjustment controls (–, 100%, +) in the top-right corner of the rendered document viewer.
- **Inline Text-Selection Commenting:** Provides an annotation column inside the preview pane ("No comments yet. Select text in the document to add one") allowing the QA Approver to highlight text and attach feedback.

3. Right Column: Read-Only Document Details & Signatures

- **Core Metadata:** Displays Document ID (ACME-WI-2026-000013), a light-green In QA Approval status badge, Name (Test), Version (v1.0), Department (Quality Control), and Author (Amit Kothari).
- **Workflow Assignees:** Lists the assigned Review Approvers (displayed as a user pill) and the designated QA Approver.
- **Author Signature:** Displays a verification checkmark with the submitting author's name and timestamp (Amit Kothari • 08-Oct-2026 7:45 AM).
- **Review Signature:** Newly added in this stage, displaying a checkmark with the technical reviewer's name and sign-off timestamp (Amit Kothari • 08-Oct-2026 9:47 AM).

4. Audit Trail Record

- **Logged Review Transition:** Prepends the latest state change ("Review approved and signed — Status: In Review → In QA Approval") at the top of the chronological history.
- **Cryptographic Verification & Export:** Displays user initials, GMT+7 timestamps, truncated SHA256 hashes, Verified badges for all 5 lifecycle events, and an Export Audit Report button.

5. Bottom Action Bar: QA Decision Controls

- **QA Assignee Prompt:** States "Awaiting QA approval by Amit Kothari" and reminds the user that approving or rejecting requires an electronic signature.
- **Approve & Sign:** Primary green CTA that opens the electronic signature prompt, transitions the document to Approved, and generates the final controlled PDF.
- **Reject:** Red destructive button that requires an electronic signature and returns the document to the Author in Draft status for revision.
- **Cancel Document:** Secondary action button located next to Reject to cancel and terminate the document record.

Would you like to examine the **Approved** document screen next, or detail the **Approve & Sign / Reject** modal requirements?

User prompt: this is approved screen

Response: The Accura Approved Document Screen represents the active, controlled state of the document (step 4), introducing lifecycle management controls (`New Version` and `Mark as Obsolete`), a multi-option download dropdown, the populated `Effective Date`, and the complete set of three electronic signatures.

1. Header, Expanded Utility Bar & Workflow Stepper

- **Back Navigation & Record Title:** Displays the `< Back to Documents` link above the document title (`Equipment Introduction Form`) and the subtitle (`ACME-FRM-2026-000006 · v1.0`).
- **Top-Right Lifecycle & Utility Actions:** Replaces the basic utility bar with five top-level controls:
  - **Print:** Prints the controlled document.
  - **Download (Dropdown v):** Expanded into a dropdown menu to support downloading either the generated **Controlled-copy PDF** (with headers/footers and cover/back pages) or the original source file.
  - **New Version:** Primary green action button that initiates a revision (`v2.0` in `Draft` status) while keeping `v1.0` active and `Approved`.
  - **View Audit Trail:** Anchor button to jump directly to the compliance log at the bottom of the screen.
  - **Mark as Obsolete:** Secondary action button with a trash/archive icon to retire the document and transition its status to `Obsolete`.
- **Workflow Progress Stepper:** Marks `Draft` (step 1), `In Review` (step 2), and `In QA Approval` (step 3) with completed green checkmarks, and highlights `Approved` (step 4) as the active final stage.

2. Left Column: Controlled Document Preview

- **Collapsible Viewer Card:** Displays the `Preview` container (with the green > collapse/expand toggle) rendering the final **Controlled-copy PDF**, which automatically embeds system headers, footers, cover page, and signature/back pages generated upon QA approval.

3. Right Column: Document Details & Complete Signature Chain

- **Core Metadata:** Displays `Document ID` (`ACME-FRM-2026-000006`), a dark-green `Approved` status badge, `Name` (`Equipment Introduction Form`), `Version` (`v1.0`), `Department` (`Quality Control`), and `Author` (`Amit Kothari`).
- **Effective Date:** Newly populated in this state (`13-Oct-2026`), indicating when the approved version officially takes effect.
- **Assigned Workflow Roles:** Lists the `Review Approvers` (user pill) and `QA Approver`.
- **Complete Electronic Signature Chain:** Displays all three verified sign-off blocks in sequence:
  - **Author Signature:** `Amit Kothari • 30-Sep-2026 5:58 AM`
  - **Review Signature:** `Amit Kothari • 30-Sep-2026 5:58 AM`
  - **QA Signature:** Newly added upon final approval (`Amit Kothari • 30-Sep-2026 5:58 AM`).

4. Audit Trail Record

- **Final Approval & Controlled PDF Events:** Logs two new automatic entries at the top of the chronological history upon QA sign-off:
  - `QA approved and signed — Status: In QA Approval → Approved`
  - `Controlled-copy PDF generated (header/footer + cover/back pages)`
- **Historical Revision & Rejection Tracking:** Preserves all prior loops (such as `Review rejected document: Track changes enabled — Status: In Review → Draft` and subsequent `Draft updated` events) alongside their SHA256 hashes, `Verified` badges, and the `Export Audit Report` button.

5. Bottom Status Bar

- **Read-Only Effective Banner:** Replaces the interactive decision buttons with a static confirmation bar at the bottom of the viewport reading: `This document is approved and effective.`

Would you like to cover the **Superseded** and **Obsolete** screens next, or look into the **New Version** creation flow and electronic signature modals?

User prompt: I just clicked on the audit trail record drawer. please do the same

Response: The **Audit Trail Record** side drawer provides a cryptographically verified compliance log for document ACME-FRM-2026-000006.

Drawer Layout & Header

- **Title & Subtitle:** Displays the drawer header `Audit Trail Record` with the target record identifier and version (`ACME-FRM-2026-000006 · v1.0`).
- **Close Action:** Standard `X` icon in the top-right corner to dismiss the drawer and return focus to the document workspace.

Chronological Audit Entries (Newest to Oldest)

1. **QA Approval Sign-off**
    - **Actor & Timestamp:** `AK` `Amit Kothari` • `30-Sep-2026 5:58 AM GMT+7` (`Signed` with green badge)
    - **Action & Details:** Status changed (QA Approval). Signature: QA Approval.
    - **State Transition:** `Status` `In QA Approval` → `Approved` | `Effective date` `2026-10-13`
2. **Reviewer Approval Sign-off**
    - **Actor & Timestamp:** `AK` `Amit Kothari` • `30-Sep-2026 5:58 AM GMT+7` (`Signed`)
    - **Action & Details:** Status changed (Reviewer). Signature: Reviewer.
    - **State Transition:** `Status` `In Review` → `In QA Approval`
3. **Author Submission**
    - **Actor & Timestamp:** `AK` `Amit Kothari` • `30-Sep-2026 5:58 AM GMT+7` (`Signed`)
    - **Action & Details:** Status changed (Author). Signature: Author.
    - **State Transition:** `Status` `Draft` → `In Review`
4. **Review Rejection Loop**
    - **Actor & Timestamp:** `AK` `Amit Kothari` • `30-Sep-2026 5:57 AM GMT+7` (`Signed`)
    - **Action & Details:** Rejected (Review Rejection). Signature: Review Rejection • Reason: `Track changes enabled`.
    - **State Transition:** `Status` `In Review` → `Draft`
5. **Initial Draft Submission**
    - **Actor & Timestamp:** `AK` `Amit Kothari` • `30-Sep-2026 5:52 AM GMT+7` (`Signed`)
    - **Action & Details:** Status changed (Author). Signature: Author.

- **State Transition:** `Status Draft → In Review`

6. **Record Creation**
    - **Actor & Timestamp:** `AK Amit Kothari • 30-Sep-2026 5:51 AM GMT+7`
    - **Action & Details:** `Created`

Drawer Footer Actions

- **Export Audit Report:** A primary green button at the bottom of the drawer to export the full chronological compliance log and cryptographic verification hashes for external regulatory review.
